

Powder Shear Cell – Setup

- **Simplicity:** one article – fully functional and complete setup (two shear cells, measuring geometries, measuring shaft, etc.)
- Required additionally:
 - One of the following: Mounting plate/CTD180/CTD600
- Included in the setup:

1. Lower shaft
2. Wall friction geometry with exchangeable discs
3. **Large shear system** *PSC43 18.9 mL*, with overflow ring
4. Weights and weight base for large shear system
5. **Small shear system** *PSC32 4.3 mL*, with overflow ring
6. Weights and weight base for small shear system
7. Preparation / time consolidation bench

And more (brush, spatula...)
